About This Game

This time the Colorfull Ninjas must deliver a signed diploma to the JumpBall Ninja Association.
Only a master can sign a diploma like this and they need to get to where their master is and ask him to sign it.
But, they need to be careful with the Black Ninjas Clan.

Compared with the first title this one has a set gameplay, thus, less experienced players have less difficulty to play.

Run while balancing on the ball.
Avoid obstacles in order to reach the end of each stage.
Each stage you pass the balls will spin faster.
You can play up to 5 players.
Now the Colorfull Ninjas have three types of jumps: Ball Jump, Outball Jump and Double Jump.
From 2 players it is necessary to use gamepad, except for player 1.

See how many points you can do on solo play or with friends.
See if you can be a true ninja of JumpBall and get this diploma.

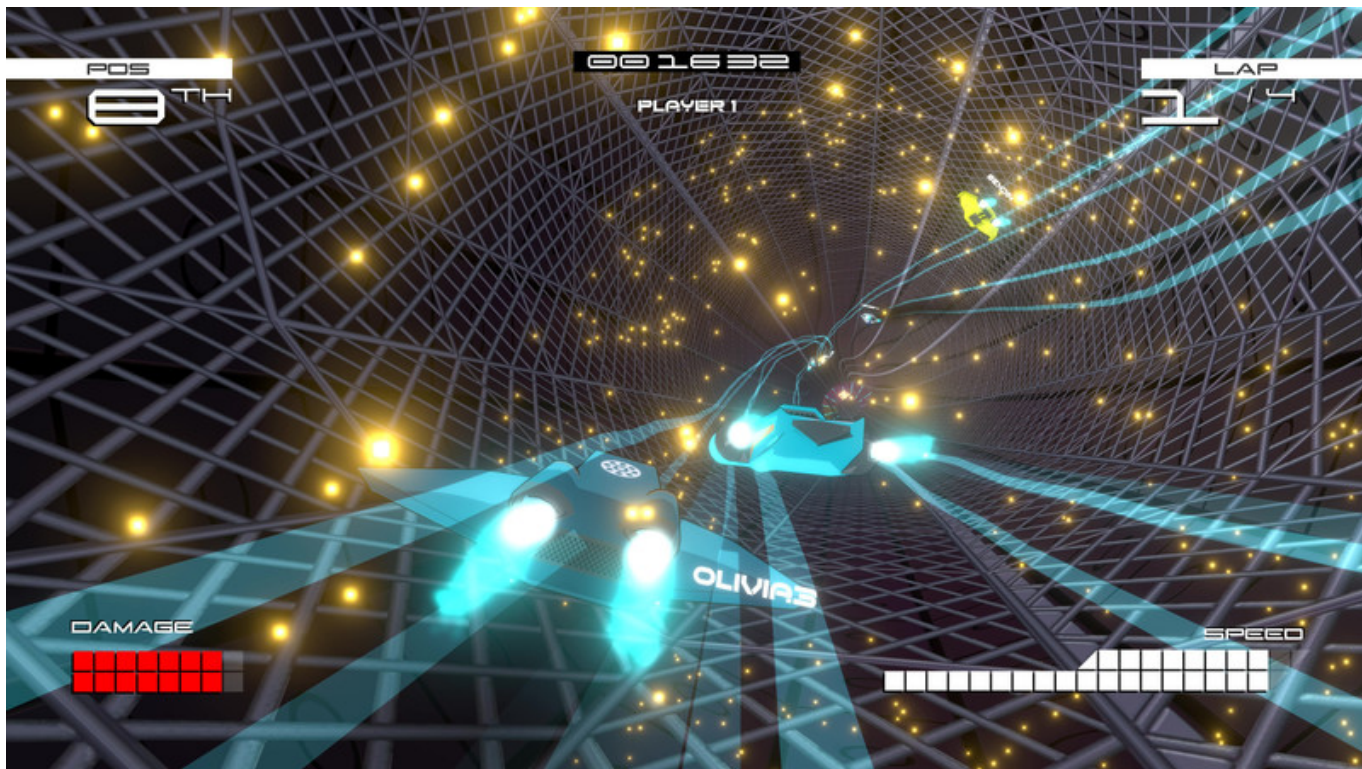

*For Ninjas

Title: JumpBall 2

Game did not age well and wasn't very good back then either. Linear.. next 20-30 years of development and this game might be worth 13 bucks. Huge disappointment. This game will not allow you to have a fair chance. The AI is able to get 10 million pop with only 3 tier 1 bases. Seriously??. Correct me if I'm wrong, but I'm pretty sure that cowboys in the old west didn't need to pull the hammer back EVERY SINGLE TIME THEY SHOOT!

I'm also pretty sure they had more than 2 GUNS back then.

Edit: Ok, I stand corrected they did need to pull the hammer back, forgive me if I didn't see that in all those western movies and games. You know, the ones that take creative liberties to make them entertaining.. Eh, there's a lot of room for improvement. It's not terrible, but a lot of the sounds here definitely do not fit for ASMR, such as the car horn, the scream (?), and others (Though I suppose they can be useful for other creative needs).

Now, I feel the sounds are useful for general relaxation, but for the purpose of ASMR specifically, very few do the trick. This software does have quite a lot of potential though. I'd like to see it developed further, as I really do like the overall concept here.

the concept is great, but the flight control need ALOT of work. I'll try this game again in 6 months and see if it has improved..
NO JUST NO i can just create blocks to win not fun at all. Epic Music

-Hard

-Fun. pretty good game. First time I played this was on PS2. I handle discs very well, but my console seemed a bit hungry. The CD's surface had more scratches than a McDonald's bathroom mirror. Never again will this be an issue, now that we have digital download.

On a different note, Lego doesn't typically put this on sale so you'll either wait another year after reading this or you could just buy it now and enjoy.

And in case anyone's wondering, the game supports the following: Xbox 360 controlling, 1080p at 60 FPS, Vsync, and whatever additional graphics options it allows. In other words, it runs better than vanilla Dark Souls. :P
